Notice of Upcoming Regulatory Changes

11/1/2023

Two California legislative bills concerning pesticide use were recently signed into law that may impact the operations of pest control businesses performing work in Orange County.

Rodenticide Law Update—Food and Agricultural Code (FAC) Section 12978.7

Assembly Bill No. 1322

Effective January 1, 2024, FAC 12978.7 is amended to limit most uses of pesticide products containing **diphacinone**. FAC 12978.7 already limits most uses of second-generation anticoagulant rodenticides (**brodifacoum**, **bromadiolone**, **difenacoum**, and **difethialone**). In addition, diphacinone shall be considered a restricted material.

Prohibited uses include residential or home uses and most industrial and institutional uses. For example, prohibited uses include, use in and around restaurants (that do not have an attached brewery or winery), grocery stores, airports, offices, construction sites, transport vehicles (e.g. ships, trains, aircraft), ports and terminal buildings, shipyards, timber yards, schools, shopping malls, sewers, and sewage treatment plants. Many non-production agricultural uses are also prohibited (such as use around man-made structures at cemeteries, golf courses, and parks).

Insecticide Law Update—FAC Section 12838

Assembly Bill No. 363

Beginning January 1, 2025, a person shall not sell, possess, or use a pesticide containing one or more neonicotinoid pesticides for any use that is excluded from the definition of “agricultural use” in FAC Section 11408 on nonproduction outdoor ornamental plants, trees, or turf, with the exception of use and possession by state certified applicators and sale by state licensed pest control dealers.

“Neonicotinoid pesticide” means a pesticide containing **acetamiprid**, **clothianidin**, **dinotefuran**, **imidacloprid**, **thiamethoxam**, or any other chemical designated by the department as belonging to the neonicotinoid class of chemicals.

If you need further assistance, please contact our office at (714) 955-0100.
